

5. Load Balancer & Auto Scaling

- Configure Application Load Balancer (ALB)
- Attach Auto Scaling Group (ASG)
- Scale based on CPU utilization

Step 1: Create target group [1]

us-east-1:console.aws.amazon.com/ec2/home?region=us-east-1#CreateTargetGroup

Search [Alt+S] Ask Amazon Q

United States (N. Virginia) Switch

EC2 > Target groups > Create target group

Protocol
Protocol for communication between the load balancer and targets.

HTTP

Port
Port number where targets receive traffic. Can be overridden for individual targets during registration.

80

1-65535

IP address type
Only targets with the indicated IP address type can be registered to this target group.

☒ IPv4
Each instance has a default network interface (eth0) that is assigned the primary private IPv4 address. The instance's primary private IPv4 address is the one that will be applied to the target.

☐ IPv6
Each instance you register must have an assigned primary IPv6 address. This is configured on the instance's default network interface (eth0). [Learn more](#)

VPC
Select the VPC with the instances that you want to include in the target group. Only VPCs that support the IP address type selected above are available in this list.

vpc-09fd27702ca76ac5a (default) Create VPC

172.31.0.0/16

Step 1: Create target group [1]

us-east-1:console.aws.amazon.com/ec2/home?region=us-east-1#CreateTargetGroup

Search [Alt+S] Ask Amazon Q

United States (N. Virginia) Switch

EC2 > Target groups > Create target group

Health check port
The port the load balancer uses when performing health checks on targets. By default, the health check port is the same as the target group's traffic port. However, you can specify a different port as an override.

☒ Traffic port
☐ Override

Healthy threshold
The number of consecutive health check successes required before considering an instance target healthy.

2 3-10

Unhealthy threshold
The number of consecutive health check failures required before considering a target unhealthy.

2 3-10

Timeout
The amount of time, in seconds, during which no response means a failed health check.

5 seconds 3-120

Interval
The approximate amount of time between health checks of an individual target.

30 seconds 5-300

=====
WARNING:
A newer release of "Amazon Linux" is available.

Available Versions:
Version 2023.10.20260202:
Run the following command to upgrade to 2023.10.20260202:
dnf upgrade --releasever=2023.10.20260202

Release notes:
https://docs.aws.amazon.com/Linux/al2023/release-notes/release-notes-2023.10.20260202.html

=====

Installed:
stress-1.0.7-2.amzn2023.0.1.x86_64

Complete!
[ec2-user@ip-172-31-29-10 ~]$ stress --cpu 2 --timeout 300
stress: info: [160504] dispatching hogs: 2 cpu, 0 io, 0 vm, 0 hdd
```
